

Reports Checklist

Achievement

I can:

- Identify the purpose of a statistically based report
- Identify and comment on survey features like population, variables, sampling methods, survey methods, errors, and sample size
- Identify and comment on the findings/conclusions of the survey

Merit

I can

- Support my comments on survey features with references to statistical evidence and processes used in the survey
- Support my comments on findings/conclusions with references to specific data, tables, summaries from the report
- Justify my evaluations by linking evidence to the report's purpose

Excellence

I can:

- Integrate statistical information with contextual information to assess report quality
- Critique survey methods, samples, errors by discussing limitations and potential improvements
- Evaluate presentation techniques, question structures, inconsistencies in the report
- Link discussions of data, methods, findings to the overall purpose and make judgments on report effectiveness
- Demonstrate statistical insight by providing in-depth, contextualized evaluation of all aspects of the report
